

## **STABILIZING POTIONS - SUBSTANCES**

### **Material needed**

A drawn circle

Wand and Staff

Substance previously distilled

24-H Water

Salt

A small bottle

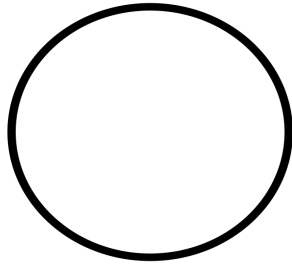

*This part is optional*

make a circle that contains you charged three times (better with a table inside the circle)

### **Substance stabilization;**

- Charge the pattern by drawing the circle 3 times
- Clean the inside of the circle
- Open the circle
- Insert the substance distilled by yourself inside a container
- Add an infinitesimal part of salt
- Close the circle
- Repeat with a Staff dipped in 24 hour water
- Let it cook/stabilize for 7/8 minutes
- Open the circle, put the prepared substance in a small bottle if needed and then put it back in the black cloth
- Erase the circle
- Label the substance produced
- Delete the circle that contains the substance

Note: while the substance is cooking, it is possible to leave the circle that contains us, by opening and closing it immediately with the stick that we take outside with us, and then re-enter it after 7/8 minutes, always opening and closing it.

**Now this element is stable.**

**All of the substances can be stabilized with 24 hour water and salt.**
